Order Ref # nnsygold-68.230.205.10-9f73941249794851b50bcdf7da25651a
 Approval # 61X17080W60345305

Web Hosting Customers:

If you have purchased shared or reseller hosting, your hosting account is setup instantly and account details are sent to your email address. For orders with add-ons it may take up to 4 hours additionally to be configured. If you have purchased VPS or dedicated server, it may take from 1 to 24 hours for the order to be provisioned depending on the configuration you've chosen. You will receive an email with access details once everything is setup. We recommend you to check our [Getting Started Articles](#) for easy start with our hosting.

SSL Certificates:

If you have purchased an SSL certificate, please go to the [SSL listing page](#) and click the 'Activate Now' link to enter your CSR. Please visit our [Knowledgebase](#) to find instructions on how to create a CSR and install the certificate on

your server. Important: Please use CSR code with 2048-bit private key to activate your SSL certificate. According to modern security standards, using CSR codes with private key sizes less than 2048 bits is not allowed.

If you have renewed an SSL certificate, please go to the [SSL listing page](#) and click the 'Activate Now' link to enter your CSR. Please visit [our Knowledgebase](#) to find instructions on what to do after placing a renewal order.

If you have purchased additional domains for your SSL certificate, please go to the [SSL listing page](#) and click on the 'Reissue' link to enter your CSR and reissue the certificate. New domains will be applied to the certificate only after reissue is complete.

Domain Transfers - EPP Requirements:

If you are transferring domains that require an EPP code (.COM, .NET, .ORG, .BIZ, .INFO, .US, .MOBI, .CN, .ME, .TV), you will need to provide us with the EPP code for those domains. Please obtain the EPP code from your current registrar. Once you have the code, go to the [Transfers in Progress page](#) and click on the domain you are transferring into Namecheap and enter the EPP code (the link will not be present if that domain doesn't require EPP). You will also be notified by Namecheap via email if an EPP code is required. Please note that the transfer can proceed only after the EPP code is provided to us.

Note for domain renewal:

It is highly recommended to use the Auto Renewal option to renew .EU and .DE domains. If you choose to manually renew these domains, please note that .EU and .DE domain renewals do not happen immediately. Please do not try to renew your domain again unless an error occurs and you are explicitly requested to try another time. Otherwise, domain may not be extended properly. If there is any problem with the renewal, the amount paid will be refunded back to the source of payment (Credit Card or Namecheap account funds).

Should you have any questions or concerns, please [contact us](#) with the above information.

Sincerely,
Namecheap Team
